## (54) PRINTING SYSTEM BY INFRARED COMMUNICATION

## (57)Abstract:

PROBLEM TO BE SOLVED: To allow printing even if there is no printer driver for specified printing unit in a host unit.

SOLUTION: Infrared ports 12 and 22 are installed in a host unit 10 and a printing unit (printer) 20 respectively, and they are made mutually infrared communication possible. When printed on the printing unit 20 from the host unit 10, a printer driver 24 is transmitted and installed by infrared communication when the printer driver 24 is not present on the host unit 10. When printing terminates, the printer driver 24 is deleted.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
